

Say Goodbye to Dropped Calls

**MORE THAN
20 TIMES
THE POWER OF A
CELL PHONE ALONE**

Wilson Electronics Sleek®

The Wilson plug-and-play Sleek® helps users reduce dropped calls, increase data rates in weak signal areas and originate calls from those dreaded "dead spots." The Sleek and its outside antenna increases any phone's output power to the cell tower while improving its ability to hear signals it normally cannot, keeping the user more reliably connected. Designed for simple set up, the Sleek can be easily moved from vehicle to vehicle.

Built into the Sleek cradle is a Wilson tried and tested bi-directional Signal Booster and battery charging port. The cradle is ideal for hands free operation in conjunction with a user's headset or Bluetooth device.

Wilson, in business for 42 years, has consistently led the industry in performance standards including the industry's best and most reliable method of signal booster cell tower interference protection. Wilson's designs consistently outperform the competition in real world performance.

All Wilson products are engineered, assembled and tested in the U.S.A. Wilson products fully comply with industry guidelines for cellular devices and are FCC Type Accepted and meet Industry Canada requirements.

FEATURES

- More than **20 TIMES** the output power than your phone alone
- Reduces dropped calls, extends signal range, and increases data rates
- Receives weak signals the phone alone may not
- Adjustable arms to fit most any phone
- Extends battery life – Signal Booster enables phone to work at reduced power
- Installs in minutes – no special tools required
- Built in booster amplifies signals to and from cell tower
- Built-in port for battery charging
- Simplifies hands free operation
- Package includes everything needed -- plug-and-play
- Attractive, compact design

Sleek® Cellular Signal Booster

FEATURES

- Reduces dropped calls, extends signal range, and increases data rates
- Built in amplifier boosts signals to and from cell tower
- More than 20 TIMES the output power than your phone alone
- Receives weak signals the phone alone may not
- Built-in battery charging port
- Extends battery life – Signal Booster enables phone to work at reduced power
- Adjustable arms to fit any phone
- Simplifies hands free operation
- Installs in minutes – no special tools required
- Package includes everything needed -- plug-and-play
- Attractive, compact design

SPECIFICATIONS

Part Number	81 5226
Frequency	824-894 MHz / 1850-1990 MHz
Gain	20 dB / 26 dB
Max Uplink Power	1240 mw / 1800 mw
Max Downlink Power	+8 dBm
Noise Figure	3.0 dB nominal
Flatness	±4 dB
Power Requirements	5V
Connectors	SMA Female
Dimensions	2.25 x 4.25 x 2.5 (inch) 5 x 9.5 x 5.6 (cm)
Weight	2.5 (oz) / 0.07 (kg)

KIT

Wilson's Sleek® improves both voice and data performance on the road. With more than 20 times the power of a cell phone alone, it features a built-in antenna, battery charging port and works with Cellular (800 MHz) and PCS (1900 MHz) frequencies.

The Wilson Electronics' Sleek signal booster kit includes:

- Sleek all-in-one cradle combo: booster/charger
- Outside vehicle mini magnet-mount antenna
- Vehicle power adapter*
- Installation guide
- 30-day, "No Questions Asked" money-back guarantee
- Limited one-year product warranty

*Use only with supplied vehicle power supply
Booster available alone - Part number 81 5225
